
KeLa Energy LLC

KeLa Engineered Fuels

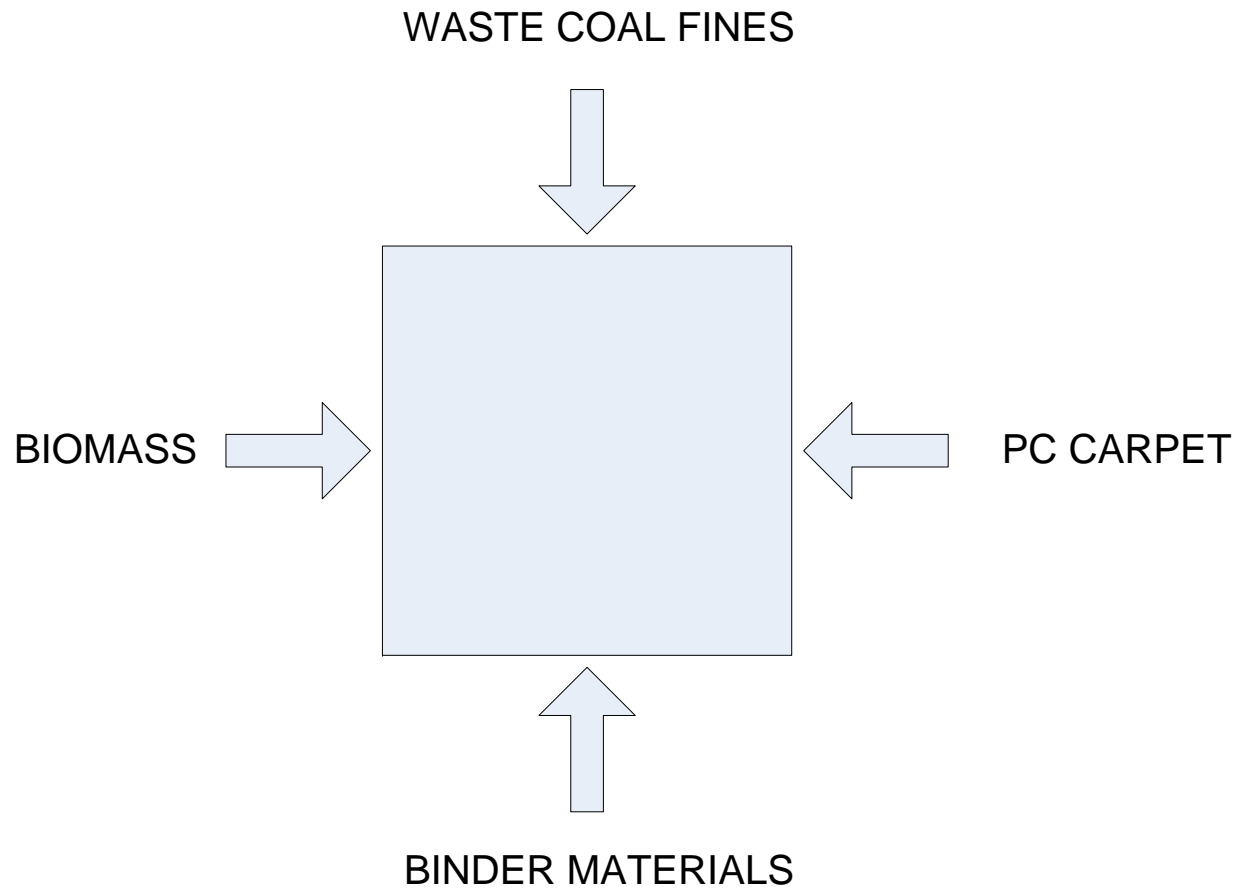

KeLa Core Technology

- Solids binding process
- Water free process
- Water resistant
- Can blend biomass into coal
- Clean, safe, environmentally responsible

KeLa Engineered Fuel

General Benefits

- Reclamation of waste coal fines
- Emission reductions
- Higher BTU than coal/wood co-firing
- Reduced moisture content
- Improved ignition – lower unburned carbon
- Handles like coal – no plant modifications
- May qualify for renewable energy credits

KeLa Energy Status

- Utility patent expected by end of 2007
- Production Plant under development
- Working with utility fuel user
- Working with major fuel supplier
- Working with major carpet company
